CDM 75th
Smith

The logo features the text "CDM 75th" in the top row and "Smith" in the bottom row. "CDM" and "Smith" are in a dark blue, bold, sans-serif font. "75th" is in a light green, bold, sans-serif font. A graphic of a lit candle is positioned between the two rows of text, centered under the "75th". The candle has a yellow flame and a body with alternating green and dark blue diagonal stripes.

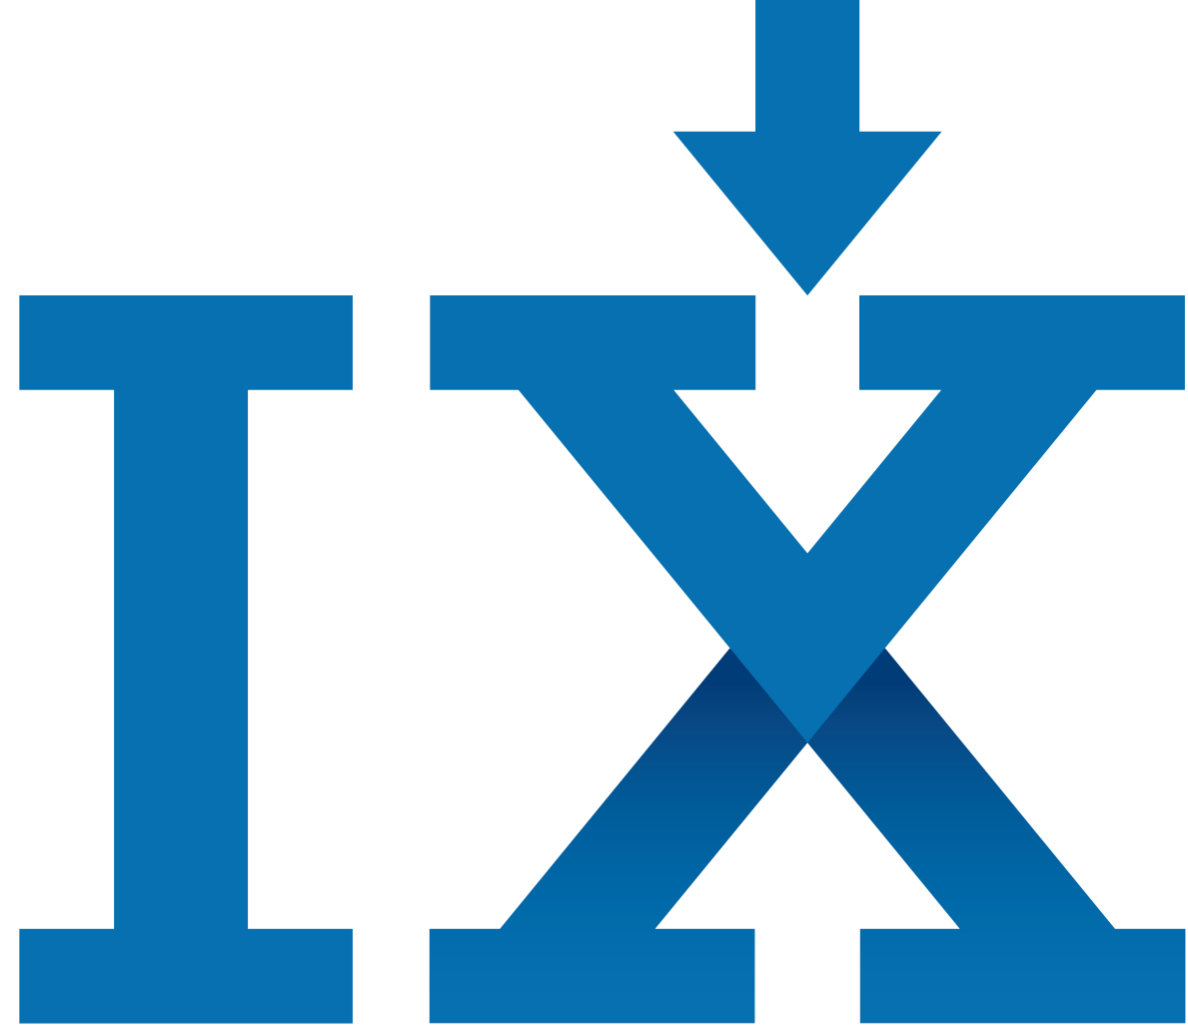

The Paper.

Which will it be, New Mexico?

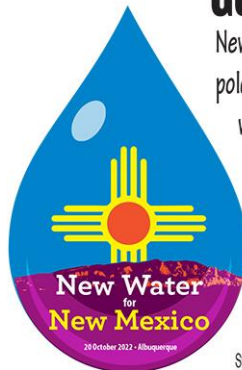

On October 20th, It's all up to you...

Get Involved! Help Ensure New Mexico's Water Supply

New Mexico is in need of water, now! We don't have time to tinker with aqueducts from the Mississippi River or to drag icebergs from the poles. We need everyone — yes, that includes YOU — to get involved with real solutions using the state's vast resources of “unconventional water” that are already here! Please come and participate in the [NEW WATER for NEW MEXICO public forum, October 20, 2022 at the Sandia Resort & Casino](#). We have a full day program of the smartest people in water who will discuss how we can assure our future here in New Mexico. Lunch is included and there's plenty of time to meet and discuss with the speakers and other smart folks, from politicians to community leaders to business mavens, academics, and, oh, YOU! Go to www.NMDesal.com for tickets now.

Speakers and sponsors come to us from The Paper, University of New Mexico, New Mexico State, New Mexico Tech, Bernalillo County, CDM Smith, Texas A&M Geography, Albuquerque Bernalillo County Water Utility Authority, New Mexico Produced Water Research Consortium, IX Power Foundation, San Juan College's School of Energy, New Mexico Bureau of Geology and Mineral Resources, New Mexico Water Data Initiative, a fluffie of jackelopes, New Mexico Interstate Stream Commission & Office of the State Engineer, US Bureau of Reclamation, IX Power Clean Water, Trussell Technologies, DKD Engineering, Fluence Corp. / Wateryg.
